

INTEGRATION OF ESG PRINCIPLES INTO THE PROCUREMENT PROCESS

ACCIONA has incorporated sustainability criteria into its procurement management process with the Sustainable Procurement Guide. Although there is still much to be done, at ACCIONA more and more orders are being identified with this brand every year. 2,723 orders were marked as sustainable in 2019, of which 527 were placed with socially responsible companies.

Sustainability criteria in procurement and contracting management

Renewable energy

369.87 GWh of renewable energy were consumed in Spain in 2019. 1,184 installations consumed 100% renewable energy and 105 plants added to the use of 100% green energy.

Eco-efficient vehicle fleet

The fleet of vehicles for executives included 419 vehicles in 2019, of which 148 are low-emission, i.e. less than 120 gCO₂/km, which also means lower fuel consumption. 89% of the vehicles in the executive fleet have EURO5 and EURO6 engines, 11.9% are hybrid vehicles with EURO6 engines (total 50 vehicles) and 0.7% are electric vehicles (total 3 vehicles), which means lower emissions of CO₂ and reduced emissions of NOx and particles.

As for the service fleet, ECO or zero emission vehicles increased in 2019 by 104%, with electric, hybrid and LPG/CNG vehicles available.

Sustainable wood

1,714 tons of wood with chain of custody certificates (FSC, PEFC, or similar) were purchased for Construction.

Working with Special Employment Centres

Contracts were signed with 14 Special Employment Centres that promote the incorporation of people with disabilities into the labour market. These contracts totalled €1,559,449 for the year. ACCIONA has an arrangement with these companies primarily to supply work clothing, laundry services, safety materials, travel agencies, printing and vending machines and consultancy.
