

ACCIONA, in its Water business line, leads the water treatment sector, providing global solutions that contribute to **sustainable development** in the water sector, through innovation in the design, construction and operation of drinking water treatment plants, wastewater treatment plants, reverse osmosis desalination plants, tertiary treatments for water reuse and distribution, supply and maintenance management of the sanitation network.

In particular, our purpose is to manage the productive physical assets of our Clients, considering the nature, scale, context and type of operations they carry out, to contribute to their sustainability and the fulfillment of their strategies.

For this reason, the General Management of **ACCIONA's Water business line** is firmly committed to the development, implementation and continuous improvement of a Management System for our Customers' physical assets, considering the nature, scale, context and type of operations they carry out, in order to contribute to their sustainability and the fulfillment of their strategies.

The Physical Asset Management system provides the necessary framework to:

- Align asset management strategies, objectives, and activities with the organization's objectives.
- Understand our clients needs.
- Manage risk related to physical assets.
- Manage complete life cycle of physical assets in an interdisciplinary way to achieve the highest return on value, having the necessary resources according to the scope of the contracts with Clients.
- Ensure compliance with legal and contractual requirements applicable to physical assets.
- Standardize asset management across all different projects, based on organizational criteria, and ensure a consistent and efficient approach.
- Develop technology use and integration to ensure asset management digitalization and promote continuous improvement.
- Ensure asset management in all those asset related with project cybersecurity.

All ACCIONA Personnel in its Water line of business **are required to** be aware of this Policy, and to commit to its compliance.

Manuel Manjon Vilda
