

# Stakeholder Engagement Plan

## Why a Stakeholder Engagement Plan?

ACCIONA is concerned about not only environmental impact of its projects but the social consequences – intended or not, negative or positive – that business could produce in the communities. For projects to be coherent with the sustainable business model, ACCIONA has defined a common management methodology of its own, based on standards by international institutions adapted to different businesses and geographical contexts. In this Social Impact Management the Stakeholder Engagement Plan is one of the more useful documents to get a deeper understanding of the social conditions of the project area.

## What is a Stakeholder Engagement Plan?

The Stakeholder Engagement Plan identifies and characterizes stakeholders establishing an engagement plan describing the best ways to inform, contact and involve stakeholders into the project.

## When?

The final version of the Stakeholder Engagement Plan was presented in December 2015. It is being implemented.
